Growth Strategy

Data-Driven Seed-and-Scale Real Estate Strategy

- BurgerFi currently has a large geographic footprint, wider than several of its “better burger” competitors, but with significant growth headroom for new development given its incipient number of locations
- New units are strategically positioned to either cluster within existing markets or to build-out important new metropolitan statistical areas through multi-unit development

Current & Anticipated BurgerFi US Locations

Significant Whitespace Exists with Premier Non-Traditional Relationships

- BurgerFi's "non-traditional" venue targets include airports and transportation hubs, travel plazas, higher education, military bases and sporting venues
- While the Company has already ventured into this space with very promising initial relationships, management believes that the future of these partnerships will produce significant additional growth through marquee, high-volume units
- The Company currently has license agreements in place with major F&B operators including Aramark, HMS Host, Delaware North, SSP America and the US Air Force Services Activity
- Additional non-traditional sites are already under development

Fort-Lauderdale
International Airport

CNN Center
(Atlanta, GA)

Case Study - Aramark

- Aramark (NYSE: ARMK), with revenues of \$15+ billion, operates foodservice contracts in higher education, stadium, cultural and transportation venues. BurgerFi's first unit in partnership with Aramark opened in 2017 at Temple University (Philadelphia, PA). Based on the success of that location, Aramark has launched an expansion program with the Company that includes the following:
 - University of South Florida
 - Philadelphia Fashion Center and Transportation Hub
 - Pioneer Place, Portland, OR
 - Entertainment Center, Charlottesville, VA

Airport Case Study - HMSHost

- HMSHost, which operates in 120 airports worldwide, is the franchisee/operator of BurgerFi's first airport location at Ft. Lauderdale-Hollywood International Airport (FLL)
- While the Ft. Lauderdale location is not well-situated within the airport, sales have exceeded \$3 million annually, demonstrating what management believes to be the true potential of airport units to generate sales in excess of \$5 million annually in prime airport locations
- The Company is in talks with other airport concession operators, and management expects that BurgerFi will be a major contender in multiple high-profile airport concession bids going forward

Chain Reaction Report

How Top Restaurants Rate on Reducing Antibiotic Use in Their Beef Supplies

2019

BurgerFi was recognized for two years straight by Consumer Reports and the National Resources Defense Council (NRDC)'s Chain Reaction Report. In 2018, BurgerFi received an A-Rating on their antibiotic score card as one of only two brands serving passing grade beef. In 2019, they were awarded "Best Burger Joint" as a leader in the fast-casual burger sector with higher year-over-year sales from 2017 to 2018, indicating that better beef can be a win for the bottom line as well as for public health.

2018

In the Chain Reaction's fourth annual collaborative report, BurgerFi was named as one of only two of the top 25 largest QSR and Fast Casual chains to receive an "A" for serving beef raised without the routine use of antibiotics. This recognition solidifies BurgerFi's reputation in the better-burger industry and validates its dedication to quality food that ensures no steroids, antibiotics, growth hormones, chemicals or additives are ever used in the process
